Woodcomfort - The seduction of comfort and design in Turkey

The thermal and acoustic comfort and the antivibration ability that only cork can provide, coupled with a modern and distinctive look of wood make **Woodcomfort** product lines increasingly required for major international projects. In Turkey, several landmark engineering works have used this **Wicanders®** product line par excellence, not only due to its cutting edge design and a wealth of fascinating patterns and finishes it offers, but also due to the strong environmental awareness inherent in any cork based product.

In Istanbul, the largest city in Turkey, **Woodcomfort** has recently been used in 3 architect's plans:

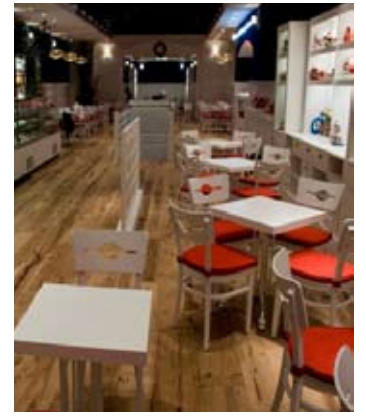

The Titanic Hotel (Taksim), a design by architect Asli Arikan DAYIOĞLU of the Metex Design Architecture Group; 300m² of **Woodcomfort**, Ref.: American Walnut.

100m² of **Woodcomfort**, Ref. Mutene, were installed in the Pierre Loti Hotel located in Eminönü. Yaşar Vitas of the Taksim Constructions Group was the architect responsible for the design of this hotel.

The Zamane Kahvesi (Nişantaşı) restaurant, a plan designed by the Özlem Yalim Architecture Group, chose Woodcomfort, Ref.: Hickory Rustic. A total of 300m² of **Woodcomfort** were installed.

Also in Turkey, in Antalya, the Mob Mobilya Dekorasyon architecture group has designed the Sensimar Hotel, where several different designs of the **Woodcomfort** product range totalling 7000m² were installed: White Oak (5000m²), American Walnut Plank Oak (1000m²) and White Oak Plank (1000 m²).
